

DRIVEWAYSPIKE :: DS-22

The Drivewayspike is the best solution for preventing unwanted visitors to your home or office. The spikes are made from yellow molded plastic which look dangerous from a distance, but in reality will cause no damage to a car. Drivewayspikes can be used in a multitude of applications such as in schools or in residential, commercial or industrial areas. The base of the Drivewayspike is made from EPDM rubber, ensuring that it will stand up to years of wear and tear. The posts can be replaced using our Replacement spikes (sold separately). Use our mounting system to properly install your Drivewayspike.
